

## ALUMINUM FLOOR

Fast lock system

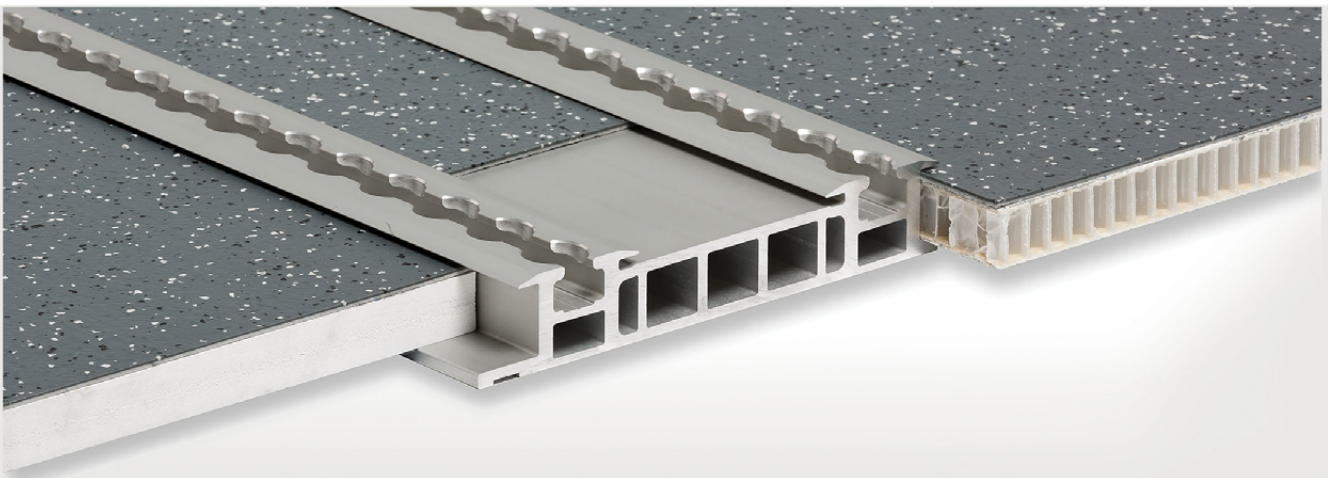

Fixed fitting system

The RAIL-IN is a mixed floor featuring an innovative system. It consists of extruded aluminum frame sections joined together and composite or wooden parts glued to the vehicle. By using the aluminium frame sections, instead of those in traditional aluminium, only where the fastenings and slides are located, makes this solution lighter and cheaper.

### BENEFIT

- TÜV-tested system in M1 M2 and M3.
- Light and low-cost system
- Flexible configuration inside the vehicle and use.
- Quick to install
- Perfect sliding of the connected devices
