

AUTOLIFT™

SEATS & FLOORS

## WELCOME TO AUTOLIFT

Autolift S.r.l. is a young, dynamic company. With twenty years of experience in the lifting sector, the company has specialized in the production of equipment for the disabled. Thanks to its highly specialized staff, cutting-edge technologies and full range of products, Autolift S.r.l. can meet the market demand for motor vehicle outfitting to serve the disabled, both for private and public use.

The company's mission focuses on:

- Ongoing research to find the best solutions to eliminate the barriers to access and transport for people with disabilities.
- Development and engineering of special devices to cover the full range of requirements from our global clientele.
- Produce aids that comply with current regulations concerning the disabled, first aid and public transport.
- Offer prompt, efficient service that enables installers to provide their customers with impeccable service both during installation and after-sales (warranty, spare parts, assistance).
- An offering that can even meet the needs of people with disabilities to board trains, ships and aircraft as per European regulations.
- Compliance of all our products with CE markings and regulations on electromagnetic compatibility. Each product, whether a lift or access step, comes not only with the relative manuals, but also with certificates of origin and conformity.

The seats and floors make up a fundamental complement for vehicle's set-up. As regards the seats, we can offer a full range of colours and configurations, whereas we have selected two types in aluminium for the floors.

## SUPPORT WITH HEADREST AND SEAT BELTS

The BPH device was created to guarantee total safety of the wheelchair passenger, even in the case of rear-ending. It consists of a support of excellent design and sturdiness, in which we find the housing for the 3-point seat belt with retractor and padded headrest. The BPH can be installed on a quick-release foot or on a special guide in order to be present in all vehicles for transporting the disabled.

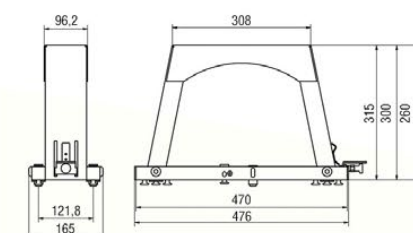

### BENEFITS

- Excellent sliding of the 3-point seat belt with retractor
- Total protection in case of an accident
- Easy to use
- Possibility of both left-hand and right-hand configuration
- 180° rotating headrest
- Headrest sliding sideways 130 mm
- Tested for the dissipation of energy caused by front and rear impact

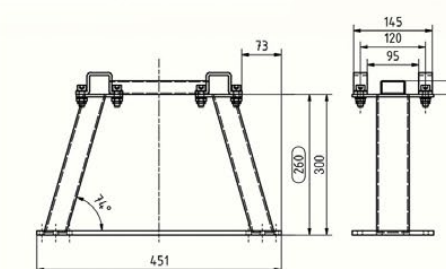

### EASYLEG

Central leg with fast lock system TÜV tested M1

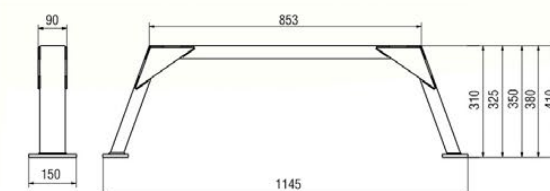

### FIXED FOOT

Central leg fixed mounting. TÜV tested M1

### TRAVERSE

Wheel arch traversal for installation over wheels of 1 or 2 seats. TÜV tested M1

## ACCESSORIES

Transport wheels for central leg

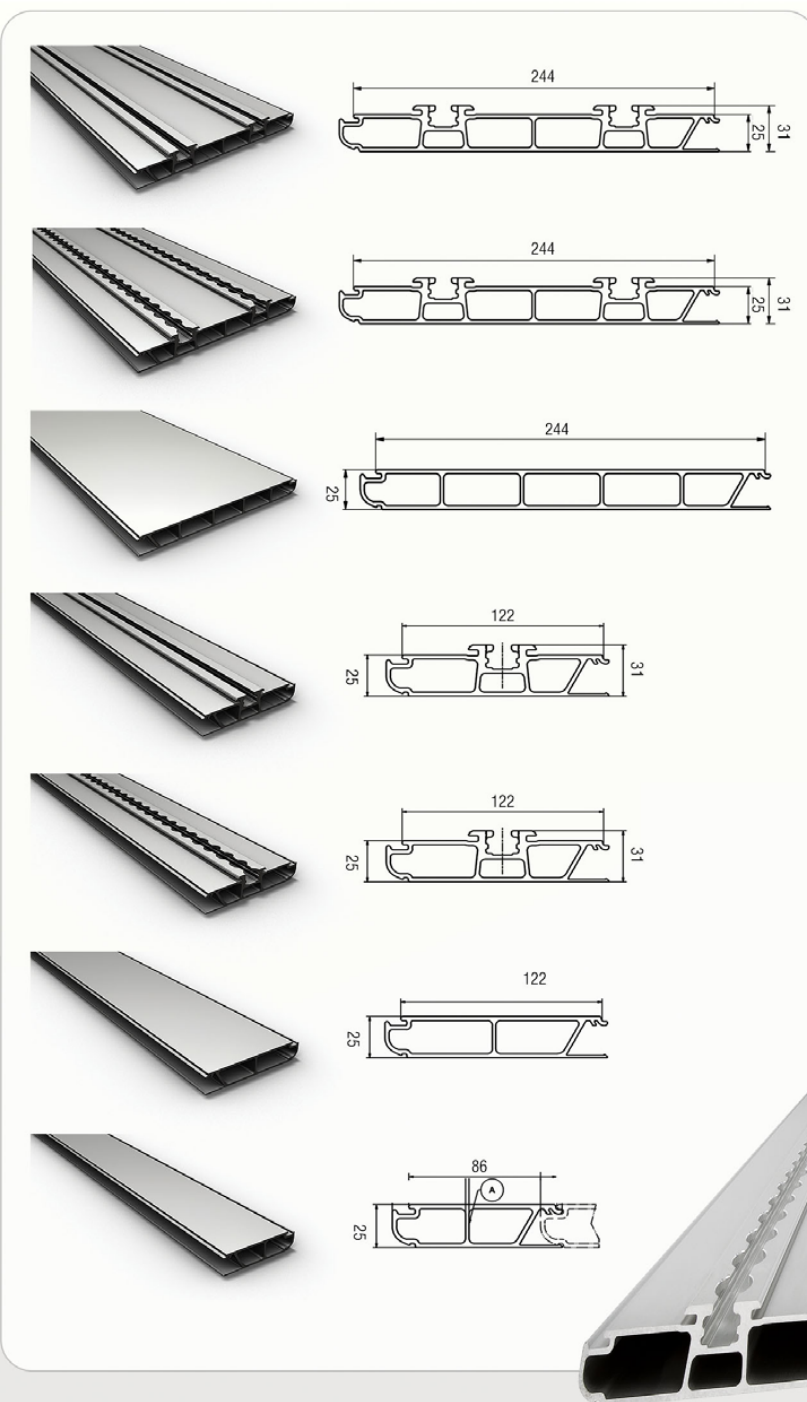

Universal fold-up armrest

Support for central foot

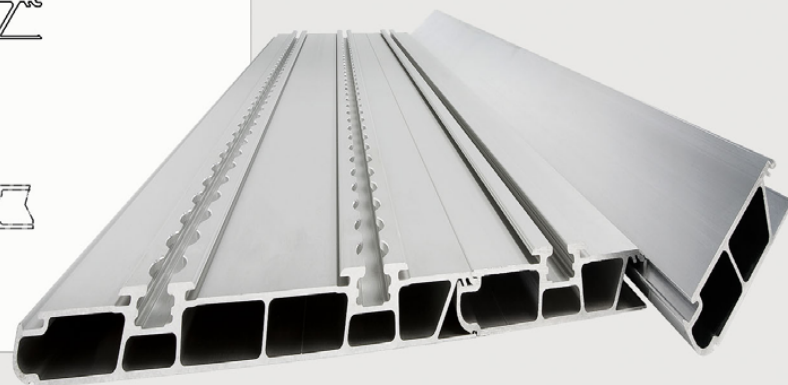

## ALUMINUM FLOOR

The ALUFLOOR floor is an innovative system consisting of extruded aluminum frame sections joined together by pressure. Once the floor is built with the required configuration, it just has to be simply glued to the vehicle floor.

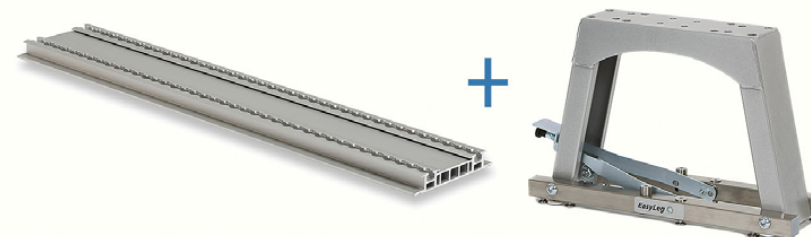

### BENEFITS

- TÜV-tested system in M1 M2 and M3.
- Flexible configuration inside the vehicle and use.
- Quick to install
- Perfect sliding of the connected devices
- Silence inside the vehicle

## ALUMINUM FLOOR

### Fast lock system

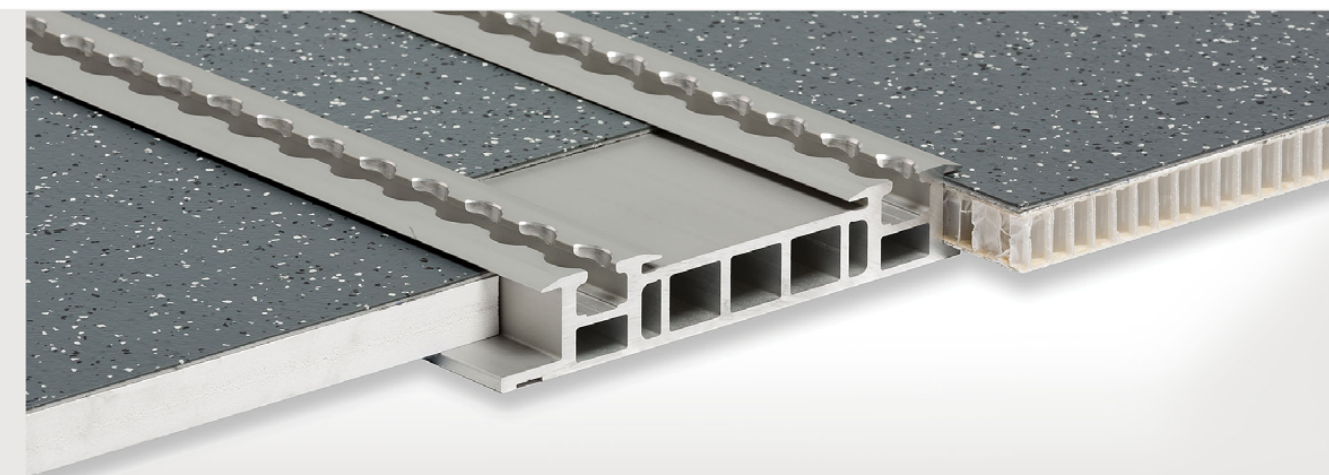

### Fixed fitting system

The RAIL-IN is a mixed floor featuring an innovative system. It consists of extruded aluminum frame sections joined together and composite or wooden parts glued to the vehicle. By using the aluminium frame sections, instead of those in traditional aluminium, only where the fastenings and slides are located, makes this solution lighter and cheaper.

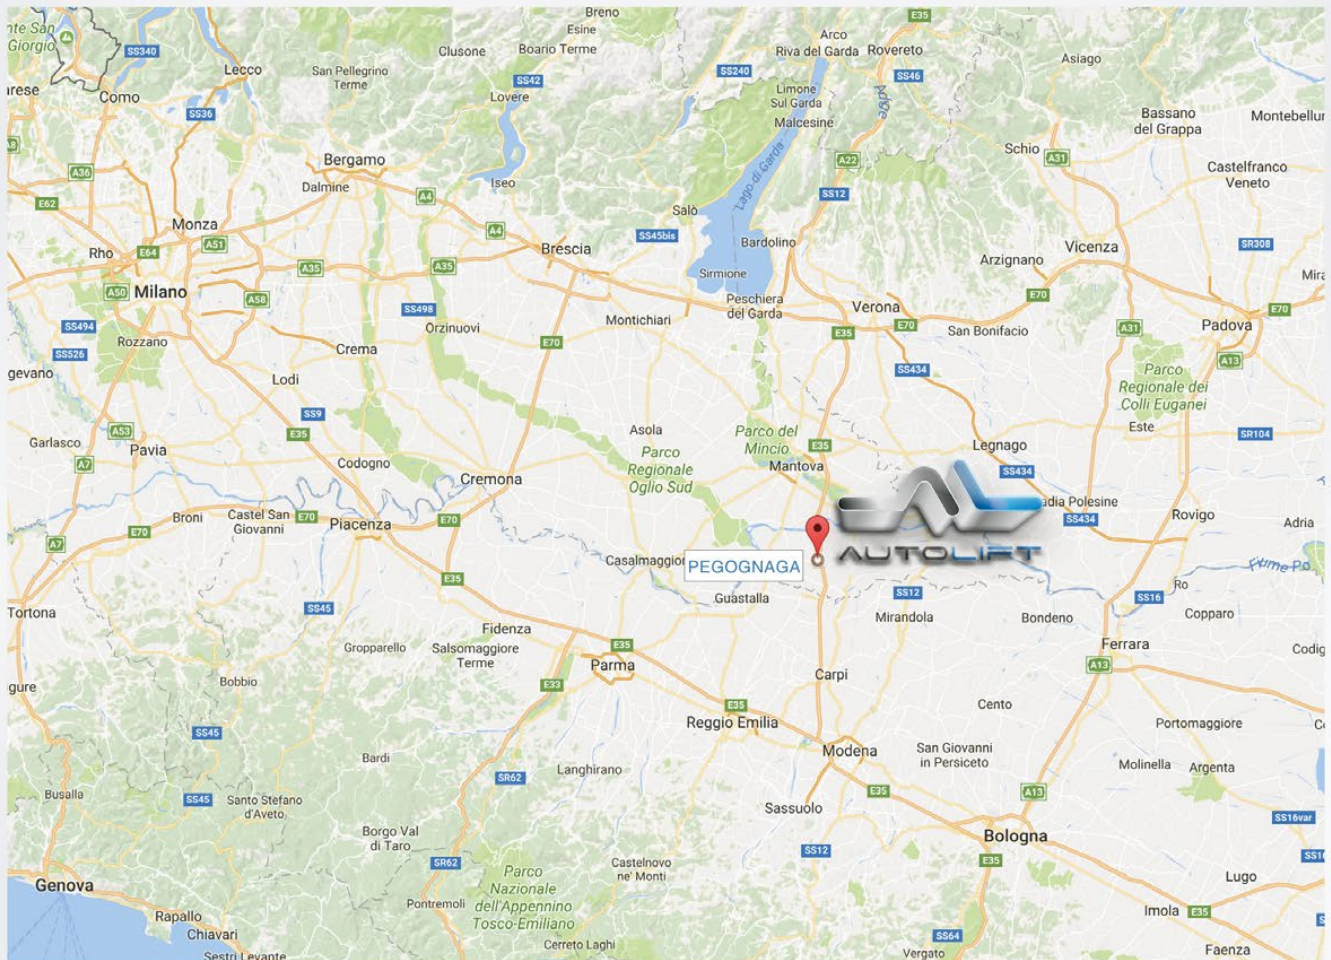

### BENEFIT

- TÜV-tested system in M1 M2 and M3.
- Light and low-cost system
- Flexible configuration inside the vehicle and use.
- Quick to install
- Perfect sliding of the connected devices
